

# Exam 1

- check solutions on class web page
- double-check addition of points
- **X** means that thing is incorrect
- **✓** (or **/**) means that thing is correct
- **ok** means it's incorrect but you still got credit (probably from earlier mistake)

Common Mistakes:

**generally:** missing units; giving scalar when a vector is expected; disorganized solution hard to follow (cannot give partial credit)

#2 – scalar vs vector answers

#3 – forgot initial speed of -10 m/s

#4 – no units

#5 – using constant acceleration equation
